

Sainte-Justine University Health Center:

A world class expertise in maternal and child health!

For over 100 years, Sainte-Justine University Health Center (SJUHC) has developed an expertise in mother and child care, education and research and has become a knowledge management center in maternal and child health.

Then, SJUHC has extended its expertise to a national and international network.

To ensure quality care every single day, Sainte-Justine University Health Network (SJUHN) provides a rigorous and effective management of all its activities, manages technological and building development projects, provides education on the cutting edge of knowledge, actively contributes to the advancement of research in many cutting edge areas, works with its local, national and international partners. It is thus not surprising that today Sainte-Justine UHN enjoys an international reputation for the excellence that it shows in all its missions, including care, teaching, research, rehabilitation, evaluation as well as health promotion.

Already present in more than 22 countries, SJUHN has acquired advanced expertise in multiple facets of health. With the development of telemedicine via SJ Virtual University Health Network, the number of collaborators who benefit from the expertise of the SJUHN, locally and internationally, has skyrocketed.

As an Organization that is part of Quebec's Health and Social Services Network, the ramifications of the Sainte-Justine UHN with either the public or private sector are manifold. Avant-garde in the development of business partnerships, the many ongoing projects with the private sector are made possible by an organizational philosophy of strategic management focused on performance and results. Professionalism, optimization of processes and services, continuous improvement, innovation, change management, business strategy, are all keywords that are part of everyday life in our organization.

Partnerships with universities and institutions are also the basis of SJUHN's success, thanks to the continued advancement of knowledge and the development of new approaches that it allows.

Whether you want the Sainte-Justine UHN to join your project as a project manager, leader, consultant or coach, a partnership with our organization is key to success. Our extensive in-house expertise allows us to meet many needs, and our rich network of partners in health, education and business, institutional, governmental and non-governmental fields, allows us, when required, to create consortia whose content and action strength can achieve exciting results.

Sainte-Justine UHN is a business that can create value and get involved, thanks to the extensive internal expertise of its teams at various levels in maternal and child health-related projects.

Construction

Design, building and implementation of health facilities, services, technology, and hospital networks:
